

600/200A, 15KV and 25/28KV Bushing Adapter

Sure-Tap™ Stud

Improved Design

Hubbell Power Systems has made an improvement to the 200A, 15kV and 25/28kV Bushing Adapter. The updated design will utilize an aluminum stud to attach the bushing adapter to the 600A bushing. The use of the provided aluminum stud will ensure the bushing adapter is attached to the bushing using like metals to insure a more robust electrical connection. The updated design meets all requirements of IEEE Std. 386 and is fully interchangeable with all other manufacturers that also comply with IEEE Std. 386.

Features

- All aluminum current path. No more mixed metals
- Special aluminum stud provided

Old Part Number	New Part Number
915BA	615BAS
925BA	625BAS

Note: Copper version also available for 900A bushings.

A proud member of the Hubbell family.
