

A close-up photograph of a mechanical assembly, likely a part of a vehicle's suspension or steering system. The assembly is dark-colored and features a prominent threaded rod extending downwards. Two red arrows point from text boxes to specific components: one points to a small, light-colored cylindrical part on top of the assembly, and the other points to a thin, dark ring on the threaded rod. The background is a dimly lit industrial or workshop environment with overhead lights and structural elements.
