

A close-up photograph of a mechanical assembly, likely a part of a vehicle's suspension or steering system. The assembly is dark-colored and features a prominent threaded bolt extending downwards. A red arrow points from a text box to a small, cylindrical component on the top surface of the assembly. Another red arrow points from a second text box to a ring-like component located just above the threaded portion of the bolt. The background is a dimly lit industrial or workshop environment with overhead lights and structural elements.
