

SLACKLOOP® ADJUSTABLE CABLE STORAGE

The **SLACKLOOP Adjustable Cable Storage** neatly stores slack ADSS cable on wood poles, concrete poles, and lattice towers while maintaining the appropriate cable bend radius. The Adjustable SLACKLOOP System consists of independent crossarms and spools that can be placed any distance away from each other on the structure to adjust for the desired storage length. Cable straps (not provided) can be used to neatly group cable loops and secure the cable to spools or keepers, if desired.
