

HEAT SHRINK WRAPAROUND SLEEVES CRSM

FOR CABLE JACKET REPAIR

KEY FEATURES

- Fast and easy fitting thanks to the channel which can be installed without special tools
- Reliable closure system and environmental seal with excellent bonding
- Cross-linked polyolefin material, halogen-free and non-corrosive. RoHS and REACH compliant
- Unlimited shelf-life when stored under normal conditions
- Qualified to ANSI C119.1

TE's Raychem CRSM heat shrink wraparound sleeves fit easily onto the cable to repair the outer jacket and seal against moisture. The closure system consists of a raised rail profile and a stainless steel channel which can be installed without any special tools. The hot-melt sealant provides a reliable environmental seal.

Our CRSM wraparound sleeves are mainly used as insulation, sealing or as re-jacketing material for 1000V power cables, as well as cable jacket repair for Medium Voltage power cables. They may also be used as protection on various substrates, where installation space is tight or difficult to reach.

CRSM wraparound sleeves are halogen-free and stabilized against UV radiation, which ensures a long-term reliability in harsh environments. They have an unlimited shelf-life when stored under normal conditions.

Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.

ORDERING INFORMATION

Kit includes wraparound sleeve and stainless steel channel closure. Both can be field cut for shorter requirements. Kit does not include connectors.

Use the "Primary Electrical Repair" columns for electrical repair applications (when CRSM is in direct contact with the conductor).

Use the "General Sealing Use Range" column for general re-jacketing or sealing applications (when CRSM is not in direct contact with the conductor).

Bulk packaged product and additional sleeve lengths are available. Consult your TE Connectivity representative.
