

US Patent Pending

The Tarptainer™ is a zero-entry height containment system that fits under large electric utility transformers or other equipment with approximately 1" of ground clearance. Its quick-fold sides remain upright on their own or with the support from straps over the equipment. The Tarptainer™ is easy to setup and provides reliable spill containment and leak prevention.

Reinforced straps & buckles secure Tarptainer™ to transformer

Positive locking corners & support rods for secure containment

*Transformer not included

PART #	DETAILS	A	B	C	WEIGHT	CAPACITY
TCT-969618-0	96" X 96" ABSORBENT AREA	18"	106"	106"	APPROX 51 LB	573 GAL**
